

Bath Ball

1-800-345-7873
www.cuzn.com

Standard Installation

Follow the illustrations on the right. Once installed, activate the Bath Ball by running several gallons of HOT water through it. Hot water is required.

- 1) Slip the open loop over your tub spout and move the bead upward on the loop to tighten.
- 2) position the Bath Ball directly under the spout so that all the water flows through the ball.

Unique Installations

Some tub spouts are not designed for hanging accessories. A bit of ingenuity may be required.

For example, you may have to wind the loop around the spout more than once for some types of spouts.

A spout which curves downward too sharply may require that you use a second loop in addition to the loop already installed on the Bath Ball (A)

A second loop (or a rubber band) can be used to provide a place to suspend the Bath Ball from the spout. (B)

In some cases, Velcro tabs might be required to fix the Bath Ball in the correct position. Self-adhesive Velcro is available at most hardware stores.

If you require an additional strap or have any questions please contact a CuZn representative.

It is best if the Bath Ball stays wet when not in use. Do not shake water from the Bath Ball after finishing bath. KDF filter discs will usually turn darker over the life use of the product. This is normal and is an indication that your filter is functioning properly. The life of this product will depend greatly on the quality of your water. Heavily contaminated water may shorten its life.

WE RECOMMEND REFILLING YOUR BATH BALL ATLEAST ONCE A YEAR

With all types of filter discs some media may be shaken loose during shipping and even wash out into the tub during the first use. That is to be expected. Please contact your distributor or a CuZn representative with any questions.

Refill Information

Bath Balls are extremely easy to refill. Simply snap open the ball, replace the old disc with your new CuZn filter disc and snap shut. Remember to activate your new refill. Contact your distributor or visit us at www.cuzn.com to order your refill. Used filters **CAN BE RECYCLED** through our recycling program. Information is available at www.cuzn.com.

Your Bath Ball Contains A

- KDF-55 disc
- KDF-85 disc
- Activated Carbon disc
- Catalytic Carbon disc

Keep this information to order the correct refill for your Bath Ball

Limited Warranty

This CuZn filter is designed for use on potable systems only. Its effectiveness may be reduced in areas where municipally treated water has chemicals such as polyphosphates to alleviate water problems caused by high iron content. Do not use this filter in water supplies that may reach pressures over the recommended use stated on the instructions. The manufacturer warrants this product to be free from defects in materials and workmanship when installed, operated, and maintained in the manner instructed, for a period of one year from date of purchase. The warranty is limited to the repair or replacement of any filter that fails to perform due to faulty materials or workmanship during the warranty period. To qualify for this warranty, the filter must be maintained and replaced as stated in the instructions. Save your receipt. CuZn is not responsible for any damages occurring during the misuse of this product.
